Beldon Roofing Receives Two Highly Coveted Awards

San Antonio, TX- (Jan. 20, 2006) San Antonio-based Beldon Roofing has been honored with two of the most-coveted awards in the commercial roofing industry, highlighting the company's commitment to workmanship excellence and customer satisfaction.

Beldon has received the 2005 Master Contractor Award from Firestone Building Products Company of Indianapolis, awarded to top-selling commercial roofing contractors who earn superior inspection ratings on all installation projects utilizing Firestone Roofing Systems. Beldon is one of only 250 companies in the U.S., Canada and Mexico to earn this distinction in 2005.

Beldon has also been recognized for professional excellence by roofing manufacturer Carlisle SynTec of Carlisle, Pennsylvania, earning the company's 2005 ESP (Excellence in Single-Ply) Award. Only 113 roofing contractors in the U.S. were chosen for this elite group of high-volume roofing contractors who earned superior marks for quality installation of Carlisle single-ply roofing systems.

"We are truly honored to have received both of these honors," said Brad Beldon, President and CEO of Beldon Roofing. "A small percentage of companies ever gets one of these awards, and only a minute few ever qualify for both, especially in the same year."

"For us, it's recognition of our hard work. It makes us feel good to be among the cream of the crop, and shows that going the extra mile for our customers pays off."

Beldon Roofing, a family-owned business, is celebrating its 60th anniversary this month. They are approved applicators of every type of standard roof system available. Their commercial projects include roofing and sheet-metal work on schools, office buildings, strip centers, shopping malls, warehouses, manufacturing plants, multi-family centers, institutional facilities, theme parks and specialty single-family dwellings throughout the United States.
